Q: How can I access a Sprite Kit node's child nodes from a SKAction instance? I have an SKNode subclass called InteractiveNode that extends the SKSpriteNode base class. I assign this node as a child node of another node, called contentNode (a Sprite Kit SKSpriteNode subclass, also with its own children). Now, I want to perform an SKAction that alters the positions of the child nodes of contentNode by having 3da54e8ca3
