A swash control valve (also known as a "swash plate") is used as a device for adjusting the supply of water between a supply source and a water distributing body. Further, a movable member of the swash control valve is configured to be movable toward and away from a stationary member using the elasticity of the movable member when a supply of the water is increased or decreased. An example of such a swash control valve is disclosed in Japanese Examined Utility Model Application Publication No. Hei

1-72775. In the swash control valve disclosed in the above-described publication, a movable member is connected to a valve shaft, and a swash bracket is secured to the movable member. The swash bracket is rotationally connected with a rotating shaft (swash plate) that is connected with an end of the valve shaft. The rotating shaft is elastically supported by a spring member, and when the valve shaft is displaced in one axial direction due to a large supply of water, the elastic force of the spring member is released to rotate the swash bracket in the other axial direction. As a result, the rotation of the

swash bracket is transferred to the rotating shaft through a bearing member, and the swash control valve is displaced in one axial direction.$tab.addClass("smw-tabs-show"); this.showTab(this.activeTab); this.addActive(this.activeTab); for (let i = 0; i

Q: How to insert div after image with JavaScript I am trying to figure out how to make a "Like a Post" button in my WordPress

theme. I want to insert a text "LIKES" after every image. Here is my first idea: div#like_this {display:none;} $(document).ready(function(){ $(".dislike_this").hide(); }); $('.like_this').hide(); LIKES $(document).ready(function(){ $(".dislike_this").hide(); }); $('.like_this').hide(); I might also want to make it so that when the "Like a post" button is clicked, all like images fade in and out. I'm thinking that maybe I will need to place a checkbox "like images" in each like image and then update the database when the "Like" button is clicked? All questions and suggestions are welcome, I have a

feeling I'm not asking this question right. A: You can add this CSS in a style.css file: .clickable { display: block; } And then add this script and put it after the.like_this div: $('.clickable').on('click', function() { $(this).hide(); $(this).next('img').show(); }); The.like_this div will become.clickable because of the style attribute. Then, when you click on it, it will make the.like_this div show the image after it. Here's
