You can preview the video before adding it. Fill: Use shapes, text, or patterns to fill in an area, or make a Gradient Map. Color range: You can make the images completely black and white. As usual, I'm a big fan of giving new work time to find its feet. I think that's how you know whether a cover is working or not. I first did the cover for "The Changeling" and it was not the best first cover for the book. What I really liked was that it was eye-catching, but it was also sort of at odds with the mood of the story. So I thought that I'd try something else out and see what happened. This cover is pretty close to what I had in mind. And here's the book. I know some people are saying "ehhh... it's Amazon's covers that sell." Maybe. But I'll take any sales in a totally new market. I don't want to be left behind in my day job, you know? :) This was the first time I worked with a brand. The most common type of brand I work with is Indiegogo, which I'm more used to. I was curious to see how brands work, and who'd send me to work on a new brand. It was a little weird starting from the beginning. It's a bit like running a new

case study without a lab to feed you data from. But I had a good time. I made the mockups for the cover and the logo, I matched my own photos with the designed artwork, I wrote the copy for the splash page, and created a list of questions to make sure I'd covered everything from a branding point of view. I've been working with green backgrounds on a lot of my covers lately, and I've definitely been enjoying the colors. I had a great time working on this cover. The way I work for a brand is much like the way I work for every book cover that I do. I'm an artist first and foremost, and sometimes I can let my ideas blur into the artwork. But for a brand, I want to keep tight to my own style. This is one of those times. I think the colors and the type really set the mood for the book.Q: Informativeness of belonging to the same group Let's take Lévi-Strauss's and Lacan's ways of explaining a term "group" and its relationships with other terms.
